

Residential Energy

Save on home energy costs today

*"I saved nearly \$20 per month just by switching to another supplier in my area with the residential energy program."
—Shawn S.*

*"I switched from variable rate pricing to a fixed rate through the residential energy program. This winter I will be able to breath a sigh of relief knowing that my rate won't spike once the cold weather hits."
—Morgan J.*

Uh-Oh. Hope you have a chair ready... your monthly energy bill has arrived and the recent extreme weather is about to wreak havoc on your wallet. It seems like you're at the mercy of your energy company. After all, what other choice do you have?

The Power of Choice

Due to the deregulation of the energy market in select areas, you now have the choice of who supplies the energy to your utility company, who will continue to service your account.

The 5LINX® Residential Energy Program empowers you with the knowledge you need to make an informed decision when selecting an energy supplier. And don't worry, you won't experience any interruption in your service if you decide to switch your energy supplier.

About the Program

Competitive supply offers vary from market to market and may include both fixed and variable pricing.

- **Fixed Pricing-** Lock in a rate and avoid the rollercoaster of price fluctuations for your service. You pay the locked in rate for the life of your contract.
- **Variable Pricing-** May offer a discount off the utility company's price but may fluctuate with market conditions month to month.

How It Works

Don't just settle for the price you're currently paying for energy. Check out the website provided by your 5LINX Representative to compare competitive energy supply offers and see if you're eligible for savings on your energy bills.
